Why Should I Compost?

Food scraps make up almost **22%** of the waste stream in MA

*based on 2019 MassDEP data

By composting, you can turn those food scraps...

Composting...

- adds nutrients, moisture, and carbon to soil
- helps plants grow
- is fun and easy!

Into black gold!

Composting is nature's recycling system at work

In a few months, you reduced GHG emissions and helped your plants thrive!
